

```
public void method(int x, int y) {  
    int z = x + y;  
    int w = init(x, y);  
    for (int i = 0; i < z; i++) {  
        w += x * y;  
    }  
    return w;  
}
```
